

SIT/SAT Ballistic Shields

4 Protection Levels

- 5.56 – 7.62 & under
- 50 Cal. M33 BMG (BALL)
- 50 Cal. M8/MK211(AP)
- 30MM MK239

Flex-plate technology ensures our frontal shields will not crack or break.

- Portable
- Deployable
- Rapid Course Reconfigurability
- Multi Terrain Use – Ground Or Waters Edge
- Long Term Protection for Minimal Cost
- Zero Maintenance
- Easy carry
- ITAM/LRAM Friendly

No longer expend expensive man hours and material costs constantly maintaining, repairing, or replacing concrete and earth bunker coffins.

These Live Fire Ballistic Shields last for many years and render surface mounted concrete/earth protection obsolete.

Traditionally, convoy courses have been minimized by fixed target positions which gunners can spot and be prepared for. With Patriot's Ballistic Live-Fire Shields, you merely position your lifter, place the Live-Fire Shield on it, conceal with brush, branches, tumbleweeds, sand, etc. if desired to blend it in to the surrounding terrain, and begin fire. This renders the target point virtually undetectable and thereby creates a realistic reaction and response under simulated combat conditions.

Courses can easily and swiftly are reconfigured by merely lifting and carrying the lifter and ballistic shield to a new location, re-concealing it, and begin training anew with an entirely new course configuration.

Patriot's vulcanized ballistic rubber easily surfaced mounted to the shields for round encapsulation and to minimize ricochet as well.
