PATRIOT PRODUCTS

OUR MISSION

To deliver state-of-the-art, fully customized training solutions to our nation's warfighters and first responders. These solutions are meticulously designed to meet specific mission requirements and manufactured to the highest standards of quality and durability. Our goal is to ensure long-lasting, reliable performance. We stand proudly behind our products, offering unrivaled service, support, and maintenance. Through our commitment, we guarantee training solutions that withstand the test of time.

CUSTOM SOLUTIONS

Known for our consummate innovation and attention to detail, Patriot Products continues to change the face of both the live-fire ranges and training aid industries with custom concepts and one-of-a-kind craftsmanship. If you discover a challenge, we will design a solution.

MULTI-INDUSTRY

Specializing in live-fire range systems and training aids, our ability to create custom solutions allow us to meet the needs of any emergency service or special operational outfit.

FOR PATRIOTS, BY PATRIOTS

We are a small family business comprised of combat veterans, and dedicated civilian staff, who take pride in service to our military and first responders.

Service, to those who serve.

Patriot Range Controller

Our Range System Controller is the **intuitive user interface** for all Patriot Products range systems. Installed on a MIL-STD-810H and IP66 certified tablet capable of withstanding 6ft drops. The simple interface and scenario writer allows for easy and **quick recall of saved scenarios**. Control up to **1000 separate targets** using the Patriot Control Software or TRACR. Integrates with our **Target Information and Management System (TIMS)** which includes GPS location reporting, maintenance status messaging, and inventory reporting.

STANDARD FEATURES

- Control up to 1000 separate training devices (SIT, SAT, MIT, MAT, HFS, SES, Smokey SAM)
- Adjust/Set Device HTK/Sensitivity/Target mode
- MIL-STD-810H & IP66 Certified
- TIMS system allows accurate reading of battery voltage (DC), maintenance issue reporting, and inventory management (existing serial numbers can be programmed into the TIMS system for continued inventory continuity)
- Sunlight readable & glove-enabled capacitive touchscreen
- 802.11ac or RF capability
- Target Inventory & Maintenance System (TIMS)
- **Available Upgrade:** Hot-swap batteries for uninterrupted operation

PP-PRC

Patriot Range Controller

BATL+ Stationary Infantry Target

The new **Stationary Infantry Target** is a stand alone training device that can be integrated into a system of systems increasing the training value for today's Warfighter. The ability to be **controlled individually, in groups, or in a scenario** with our intuitive control system, allows for on site scenario development in response to all training situations. Integrated with our **Target Information and Management System (TIMS)** which includes GPS location reporting, maintenance status messaging, and inventory reporting. Able to operate in **all environments, completely impervious** to all climate and weather. **Environmentally friendly** containing no hazardous contaminants or fluids.

STANDARD FEATURES

- 35 amp / 12 vdc battery or AC power converter
- Three communication modes: hardwire, 802.11ac, & RF
- TIMS system allows accurate reading of battery voltage (DC), maintenance issue reporting, and inventory management (existing serial numbers can be programmed into the TIMS system for continued inventory continuity)
- External control panel with on/off, power button and programmable LED
- User defined hits to kill, and sensitivity levels
- IR/MF simulator for low light engagements
- Auxiliary ports configurable for momentary or constant 12 vdc
- LTRaC & FASIT compliant
- TRACR compatible

PP-SIT

BATL+ Stationary Infantry Target (SIT)

ATA SIT Conversion

The Patriot Products Stationary Infantry Target (SIT) conversion is an upgrade package designed to extend the service life of functional and **non-functional ATA Defense Industries** Portable Infantry Target Systems (PITS). Designed for use with the Patriot Range Controller (PRC) this **conversion package upgrades the ATA Defense lifter** electronics and communications, while adding the Patriot Products Target Information and Management System (TIMS) which includes **GPS location reporting**, maintenance status messaging, and inventory reporting.

STANDARD FEATURES

- Conversion includes: Main Control Board, GPS, Inventory Chip, SIT Daughter Board, Reversing Relay, wiring harness and communication protocol.
- Three communication modes: Hardwire, Wi-Fi, and RF.
- Conversion comes with upgraded firmware pre-installed.
- Must be used with the Patriot Range Controller (PRC)
- TIMS system allows accurate reading of battery voltage (DC), maintenance issue reporting, and inventory management (existing serial numbers can be programmed into the TIMS system for continued inventory continuity).
- Mechanical repair parts also available for non-functional ATA units.

PP-ATA-SIT-CON

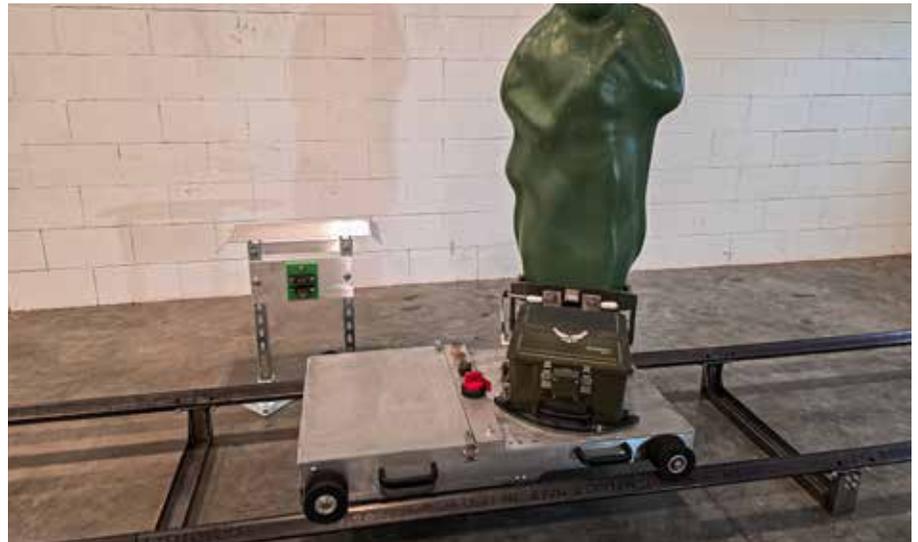

ATA SIT Conversion

Moving Infantry Target - (MIT)

The Patriot Products Moving Infantry Target (MIT) is a self powered motorized target system consisting of a Stationary Infantry Target (SIT) mounted on a **dual rail guided carriage**. When hit the MIT will react according to user defined conditions set through The **Patriot Range Controller (PRC)**. The variable speed MIT represents a moving target presentation using a 3D Ivan target attached to the SIT. Able to operate in all environments, **completely impervious to all climate and weather**. Environmentally friendly containing no hazardous contaminants or fluids.

STANDARD FEATURES

- Three communication modes: hardwire, 802.11ac, & RF
- LTRaC & FASIT compliant
- TRACR compatible
- Flexible track layouts that will accommodate curved rail sections for movement left or right
- 24 VDC with recharging plate station
- 3 user controlled speeds to simulate: walk, jog, run
- User defined Hits to Kill (HTK) and target sensitivity levels
- Swivel plate allows adjustment of SIT orientation

PP-MIT

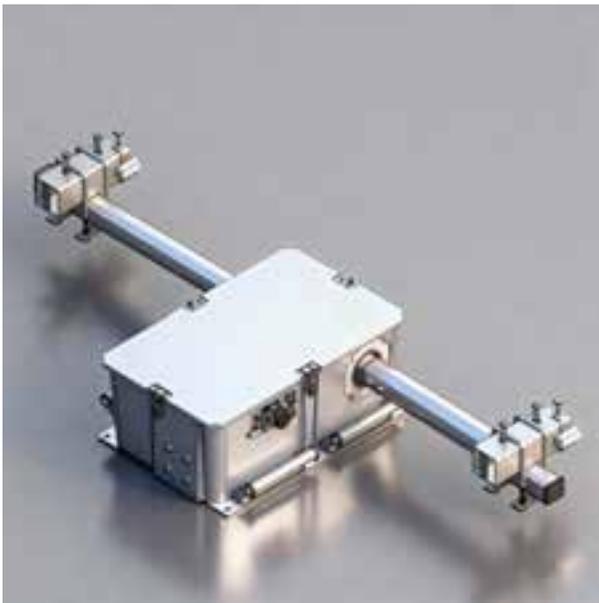

Mobile Infantry Target

Stationary Armor Target (SAT)

The new **Stationary Armor Target** is a stand alone training device that can be integrated into a system of systems **increasing the training value** for today's Warfighter. The ability to be controlled individually, in groups, or in a scenario with our **intuitive control system**, allows for on site scenario development in response to all training situations. Able to operate in all environments, completely impervious to all climate and weather. Integrated with our **Target Information and Management System (TIMS)** which includes GPS location reporting, maintenance status messaging, and inventory reporting. Environmentally friendly containing **no hazardous contaminates or fluids**.

STANDARD FEATURES

- 35 amp / 12 vdc battery or AC power converter
- Three communication modes: hardwire, 802.11ac, & RF
- TIMS system allows accurate reading of battery voltage (DC), maintenance issue reporting, and inventory management (existing serial numbers can be programmed into the TIMS system for continued inventory continuity)
- LTRaC & FASIT compliant
- TRACR compatible
- External control panel with on/off, power button and programmable LED
- User defined hits to kill, and sensitivity levels
- IR/MF simulator for low light engagements
- Auxiliary ports configurable for momentary or constant 12 vdc

PP-RNG-SAT

Stationary Armor Target (SAT)

Hostile Fire Simulator

The Patriot Products Hostile Fire Simulator is designed to provide **realistic small arms training** for live fire ranges, infiltration courses, and maneuver scenarios. Capable of emulating the **muzzle flash and sound level of a .50 cal weapon**, the HFS provides real world auditory and visual combat sensations. The simulator can be configured for **multiple control options** with our **Patriot Range Controller** that can run over 1000 individual devices, or a stand alone wireless controller that can connect to 4 individual Hostile Fire Simulators.

STANDARD FEATURES

- Each device powered by a 12V LiON rechargeable battery that can be field exchanged and last for up to a week of training under standard usage
- Approximately 2,500 shots per LP tank
- Transmits up to 1,000 meters with line of sight
- Operates in temperatures -40° through 140° F
- IP-65 rated for all-weather use
- Compatible with the Patriot Range Controller to operate over 1000 individual units
- Standard configuration includes patterns of 1, 3, 5, and random (random setting is loop-able), customized patterns available
- Simulator weighs 25 lbs
- **Additional option:** Basic wireless controller can connect up to 4 individual units

PP-HFS50	50 Cal. Hostile Fire Simulator (rebuild customer unit)
PP-HFS5012	50 Cal. Hostile Fire Simulator w/PPLLC ECU
PP-HFS50-CTL	Wireless Remote Control - operate up to 4 individual HFS units
PP-HFS50N	50 Cal. Hostile Fire Simulator (new unit)

Portable Battery Charging Station

As convoy live fire training and **DC-powered devices in target emplacements** continue to grow, the need for reconfigurable maneuver ranges to charge the supporting batteries increases. The PBCS-20 takes your charging station directly to the range, field, or a **central point on the range complex or training areas**. The standard configuration allows you to charge 32 batteries simultaneously and store over 100 more. Safer, faster, centralized charging puts your batteries back to work and **increases training efficiency**.

STANDARD FEATURES

- Power via remote generator or hardwire
- Exterior ports for remote alarm monitoring
- DOD, EPA, & OSHA compliant
- Audio / visual alarms for smoke, hydrogen gas, and emergency assist
- Insulated for operation in various climates
- Heating / cooling system standard
- **Safety features include:** acid resistant coatings, spill containment, emergency eyewash, automatic shut down, reverse arc proof, and an explosion resistant design
- **Optional upgrades:** 40' length, additional chargers, built-in fire suppression, and other customizations to meet specific requirements

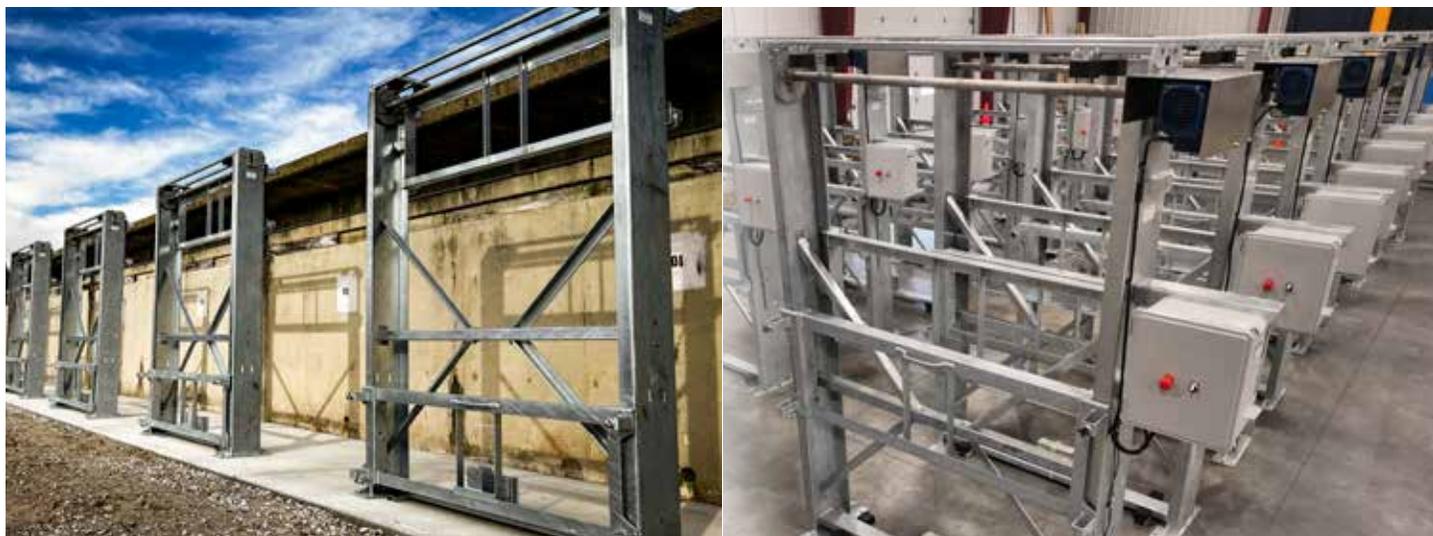

PBCS20	20' Portable Battery Charging Station
PBCS40	40' Portable Battery Charging Station

Known-Distance Heavy Duty Target Carriage

Designed to **install quickly**, this 2nd generation KD target carriage is the most **rugged, durable, and abuse-resistant model** available. Constructed of heavy gauge structural steel, each unit features a **hot dip galvanized finish** and is assembled entirely of **rust-free materials** for long-term use. Operation (expose/conceal) is smooth, quiet, and counterbalanced requiring less than 20lbs of force to operate. This professionally-designed and high-quality target carriage is **built to last**.

STANDARD FEATURES

- Virtually maintenance free
- Holds dual 72" x 72" targets
- 304L stainless steel drive system
- Full-length chain & safety guarding
- Weighted counterbalance design
- 100% stainless steel self-aligning bearings
- Operates in extreme temperatures & humidity
- Withstands up to 120 knot gale force winds
- **Additional options:** motorized automatic operation with either hardwired or wireless remote control, programmable sequence functions, and galvanized steel step

KDC-84GEN2	Known Distance Target Carriage
KDC-AMDS	Known Distance Carriage w/Motor Drive

KD Running Man / Target Turner

KD Range Turning Target

Manually operated hardened track target turner for **0-90 degree operation**. Heavy duty steel construction with hot-dip galvanized finish.

Quickly mounts to the KDC-84Gen2 Patriot Products KD carriage. The built-in detent holds the target securely in reveal/shoot mode.

KD Range Running Man Manual Moving Target System

Modular Rail System - Installed in 20 ft. sections or to suit target spacing.

Mounts to inside wall of berm face, not on overhang creating dangerous safety hazard. Can be mounted on berm overhead at Government's mandate and determination of viability. **Dual-tube rail system**, hot dipped galvanized for long lasting protection.

No ballistic safety hazard, 100% of system below berm. **Adjustable travel distance** within rail length. The target swings down to the operator for easy scoring and folds against berm wall when not in use.

KDC-84KDRM	Known Distance Range "Running Man" Target System
KDC84-TT 2	Known Distance Range Turner Target

Poly Target Frame

Patriot Products **Universal KD Butts-Board** is designed to replace the legacy wooden frames used on Known Distance ranges throughout the military. Our Butts-Board **significantly reduces costs**, particularly expensive man hours incurred supporting existing and future KD Ranges. With Butts Board KD Target frames there is no longer a need to construct and move around heavy wooden KD target frames. The poly Butts Board material will **withstand multiple round impacts** and remain servicable, and won't rot or grow mold/mildew (is impervious to water), and your target line will **no longer be littered with broken wood** and debris.

STANDARD FEATURES

- A totally weatherproof, UV-resistant, non-shattering, 3-piece frame designed to withstand thousands of direct impacts
- Universal design for edge forward or face forward target legs
- A 6'x6' frame that accommodates all of the current Corplast targets in use
- Standard temperature ratings of -40 through 140 degrees Fahrenheit
- High Safety Integrity - No metal or wood above the berm
- Interchangeable support legs
- Withstands wind gusts up to 40 mph
- Recyclable - Environmentally friendly - No Legacy
- Installs and remove quickly

PP-KDC-84G2F	ButtsBoard Known Distance Target Frame Set
PP-KD72CP	ButtsBoard KD Target Primex Backer (6mm x 72" x 72")
PPKD72FO	ButtsBoard KD Target 6ft Frame Square only
PP-KD72IN	ButtsBoard KD Target Leg Extension (Vertical Inner Support)
PP-KD72SS	ButtsBoard KD Target Leg (Vertical Upright)

Polymer Target Silhouettes

Patriot Products offers the **toughest HDPE targets available** - engineered for unmatched durability, precision, and performance. Delivering range-proven, **American-made thermoplastic polymer** solutions engineered for the U.S. Military and Law Enforcement communities. **UV and weather stable** built to purpose and fully TC25-8 compliant. Our **high temperature heat resistant** models specially designed for **MOUT and desert operations**. 3D enhanced facial and weapon detail for **advanced threat ID** and CQB training. **See the difference in your next qualification cycle.**

THE NEW STANDARD

- New US built molds for superior edge definition, detail, and semi-healing ballistic integrity
- Superior performance over legacy polymer targets
- Compatible with all major portable lifters
- Available in desert tan, OD green, black, and custom agency colors
- Reliable Ready Performance, American-Made Quality

MPETS Target System

Patriot Products has combined **fully programmable** electronic target turners and an independent RunningMan carriage in the design of our **Multi Purpose Engagement Target System**. With a Patriot Range Controller tablet, powered by our proprietary software, the **SmArtTurn System™** will maximize your training efficiency and flexibility. This **rugged solution** is proven to withstand the harshest weather and downrange conditions and is easily sustained for long life. Delivering to site in prefab sections, the MPETS with integral ballistic protection provides a **complete integrated target line solution**.

STANDARD FEATURES

- Target exposures enabled by 360° target turning
- Virtually limitless programming options for unique training scenarios
- Designed to exceed IP65 standards
- Made from corrosion-resistant materials and finishes
- Can be trailer-mounted for mobility
- **Additional options:** Ballistic containment including AR500 steel wall and ballistic rubber, RunningMan can be upgraded to support AR500 steel silhouettes, system can be expanded to support additional lanes and actuated plate racks, and extended maintenance plans available

PP-RNG-MPETS	Multi-Purpose Electric Target System High Speed 360° Turning Target
PP-STA90-R1	Smart Turn 90° Degree Actuator
PP-TH2X2-R2	2x2 H-Frame Target Holder
PP-MPTS-RM	Multi-Purpose Target System Running Man

Subterranean Trainer / Atmospherics

Effective warfare preparation requires **real-world training scenarios**. Custom designed and manufactured to meet **any training requirement**, the Patriot Products subterranean trainer incorporates a **multi-configurable** layout that can simulate environments from around the world. **RealRock™ Panels** are mounted inside conex containers to replicate underground rock walls and corridors with **unparalleled realism and durability**. Optional **atmospherics** help to create the most authentic training environments on the market.

STANDARD FEATURES

- Abuse-resistant polyurethane resin
- Able to be hit, climbed on, and rappelled down
- The Patriot Products JointConnect™ forms joint seals impervious to water
- No deteriorating effects such as cracking, checking, crazing, or delamination
- Tactical injury evacuation doors
- Full turnkey on-site installation
- **Additional options:** atmospherics, weapons caches, hidden entrances and exits, confined space training, electrical upgrades, heating, cooling, ventilation system, water features, theming based on any environment around the world

Live Fire Shoot House

Customizable to any requirement, the **Patriot Products Live Fire Shoot House** is the trusted solution for ballistic containment and training reliability. AR500 steel, vulcanized ballistic rubber, and DenShield panels are assembled together to create the **safest and most dependable training solution** on the market. **Expeditionary and requiring no construction**, we can deliver and install the Live Fire Shoot House or teach your team how to assemble it if the unit is heading to a sensitive location.

STANDARD FEATURES

- Reconfigurable for refreshed scenarios
- Ballistically secure with zero ricochet hazard
- Unique "Gravity Stud" interior wall assembly
- All-bolt construction for quick field set up
- Quick-change doorway frames hold COTS doors for breaching
- Easy to follow design and assembly instructions
- Ballistically protected sliding ingress / egress doors
- **Additional options:** observation catwalk, lead clean-outs, and it can be designed an customized to meet any requirement

PP-12SHBD	1/2 Ingress/Egress Ballistic Slider Door (nom 3ft)
PP-12SHFPS	1/2 Steel Shoothouse Wall Full Panel Assy. (nom 4Lft)
PP-38SHBD	3/8 Ingress/Egress Ballistic Slider Door (nom 3ft)
PP-38SHFPA	3/8 Steel Shoothouse Wall Full Panel Assy. (nom 4Lft x 8ft)
PP-SHBD	Shoothouse Ram-Breach Training Door
PP-SHCW	Shoothouse Observation Catwalk (3 x 8ft)
PP-SHCWSL	Shoothouse Catwalk Stairs & Landing
PP-SHSCBR	Shoothouse Safety Ceiling & Panels (Sq. Ft)

Non-Ballistic Shoot House

The Patriot Products Non-Ballistic Portable Shoot house is a lightweight, durable, easily deployed close quarters battle (CQB) trainer providing a safe environment designed for non-lethal training ammunition, blanks, or force on force engagements. Our modular design allows users to quickly assemble and reconfigure room layouts according to training objectives. Three panel styles, wall, window, door with multiple sheeting options (Pressure Treated, ABX, Fire Rated, and composites) can be primed and latex painted to the user's specification. The most cost effective solution to develop speed, precision, and teamwork for high risk environments.

STANDARD FEATURES

- Pre-designed or custom plans available
- Reconfigurable precise fit interlocking panels
- Change layout quickly with only 2 people
- Modular design allows for potential expansion
- Standard, pressure-treated, or fire rated options
- Painted for specific theater or non-painted options
- Solid wall, window panel, and door panel styles
- 8' wall standard
- indoor or outdoor applications
- **Optional:** Additional atmospheric packages available for increased realism

PP-CQCT-NB

Close Quarters Combat Training system / Non-Ballistic

Steel Targetry

Known for our **consummate innovation** and attention to detail, Patriot Products continues to change the face of both the live-fire ranges and training aids industries with **custom concepts** and one-of-a-kind craftsmanship. We started as a target company, and while the needs of our customers have carried us into **electronics and robotics**, we still have a passion to meet your requirements and exceed your expectations. If you discover a challenge, **we can design a solution.**

SPECIALIZATIONS / OPTIONS

- Both military-grade and consumer models available in many products
- Custom designs available upon request
- Recent customers include: Marine Corps, Army, National Guard, Navy, Coast Guard, Secret Service, FBI, DEA, NASA, SOCOM, & NSWG
- Various types of reactive, non-reactive, swinging, and specialty targets for both handgun and rifle training
- All impact areas made of AR500 steel with other connecting pieces made from various metals to increase portability
- Rugged, heavy-duty, and long-lasting

Steel Targetry

Founded in Franklin, IN in 2008, Patriot Products, LLC is a small business (<50 employees) with an impeccable **record of past performance** that specializes in the **design and manufacturing** of live-fire range and training aids. Whether projects go through a **government prime or directly** to an end user, focus on **new installations or routine maintenance**, or require an existing product or a custom concept; we create custom solutions for training reliability.

STEEL TARGET LINEUP INCLUDES

- Round and square target plates
- Sniper targets
- IPSC & Type E/F silhouettes
- Stationary, reactive, and swinging configurations available
- Mil-dot long range marksmanship targets
- Iron Maiden with Kill Zone reactive target
- Non-automated targets (NATs)
- Dueling trees
- Plate racks, with optional powered reset
- Pepper poppers, available in both gravity and powered reset options
- Pneumatic actuated steel target silhouettes
- Components that allow for both efficient movement and replaceable impact areas
- Minimal sustainment required
- Targets with both audio and visual feedback to the shooter

Crucible Targets

Crucible Targets decisively **outperform traditional AR500**. Developed through our own proprietary Patriot Steel process, Crucible Targets provide an **exponential increase in useful life** on the range. Patriot Steel can be formed and bent to mount in multiple ways removing the need to expose target mounting hardware, welds, or holes in impact surfaces, which reduces potential for ricochets, cracks, and breakage. Crucible Targets are **proven in military testing** to outperform AR500 when subjected to repeated impacts with rifle and handgun ammunition. **Crucible Targets made from Patriot Steel** are rapidly becoming the steel target choice throughout the military and law enforcement world.

STANDARD FEATURES

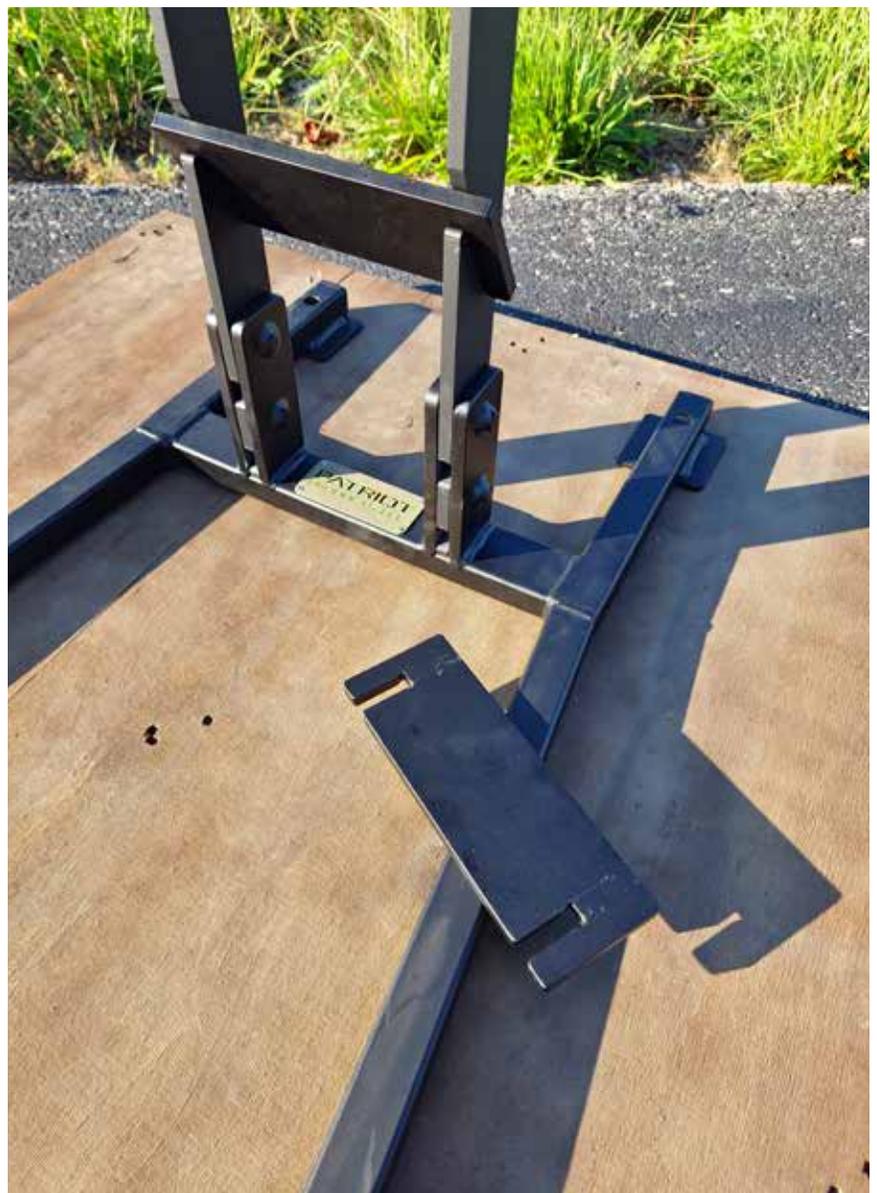

- Substantially longer life, fewer target changes.
- Proven to withstand thousands of impacts
- In use with SOCOM, USMC, DEV-GRU
- No welds or bolts, 100% flat impact face
- Outperforms traditional AR500
- Patent Pending

Iron Maiden Sniper Target

As the need for consistent, deployable training solutions increases, the Patriot Products Iron Maiden answers the call. **Available in both 7.62 and .50 cal** rated models, this **self-resetting sniper target** requires no batteries to maintain or springs to replace. The steel kill zone target falls backward raising a white "hit" indicator and **resetting in 1 second**, providing easily discernable visual and audible feedback up to 1,000 meters. The Iron Maiden is the perfect training solution for **long distance marksmanship**, sniper schools, SWAT Teams, and special operations units.

STANDARD FEATURES

- Virtually maintenance free
- Deployable for multiple training applications
- Stainless steel hardware, AR500 impact zones
- Red kill zone target falls to reveal white hit indicator
- Self-resetting in 1 second
- Visual and audio feedback up to 1,000 meters
- No batteries to maintain or springs to replace
- **Models:** available in both 7.62 and .50 cal

PP-IM50+KZT50	Iron Maiden Target 50 Cal (1/2" AR500 silh) includes Base, E silh & Kill Zone Tgt
PP-IM50BA	Iron Maiden Target 50 Cal Base (3/4" AR500 Silh)
PP-IM50KZT	Iron Maiden Target 50 Cal Kill Zone Target
PP-IM762+KZT	Iron Maiden Target Assy Rifle (1/2" AR500 silh) includes Base, E silh & Kill Zone Tgt
PP-IM762BA	Iron Maiden Target 7.62 Base (1/2" AR500 silh)
PP-IM762KZT	Iron Maiden Target 762 (& Under) Kill Zone Target

EFSAT 3D Threat Silhouettes

Designed to offer Range Managers a **cost-effective and environmentally-responsible alternative** to the traditional use of surplus military vehicles, the Patriot Products EFSAT (Environmentally Friendly Steel Armor Target) provides **360° engagement for both aerial and ground** training scenarios. These 3D threat silhouettes are available in **full or half scale models** and feature 100% recyclable 1" A36 or 1/2" AR500 steel components to reduce life-cycle costs. All TC25-8 required shapes in compliant dimensions.

STANDARD FEATURES

- Customizable to any requirement
- Delivered / relocated by air or ground
- Compliant with DOD range sustainability directives
- Accommodates advanced battlefield effects such as thermal sourcing for night operations
- Designed with high fidelity features for aerial identification
- Retains full profile through multiple uses
- Withstands a full spectrum of inert or live munitions including 5.56mm, 7.62mm, .50 cal, 2.75" rockets, & 120mm
- **Profiles include:** SA-6, BMP, BRDM, T-72, Tech Trucks, HMMWV, Artillery, Aircraft, Tactical Vehicles, Civilian Vehicles, Patrol Silhouettes, and any other requirement you might develop

Vulcanized Ballistic Rubber

All Patriot Products Ballistic Rubber is vulcanized and formed under high temperature and pressure, to create shapes bonded at the molecular level. Contains **maximum ATH fire suppressant** properties that reduce the risk of fire from isolated exposure to incidental tracer rounds. The panel itself acts as a self extinguishing water release item. **Superior strength, elasticity, and durability**, with a tensile strength of 950-1150psi. Ultimate elongation: 210-300%, 100% modulus: 350-400psi, coefficient of friction: 1.2-1.25 static. UV exposure, ATSM D 925-88(00) 72 has ten inches below 275W RS UV bulb: tensile strength 5.9 % change, elongation 6.7% change.

STANDARD FEATURES

EPR-91224	Special Ballistic Rubber for 5.56 EPR 9"x12"x24" Wght:115#
PAR-2424	2"x24"x24" Ballistic Rubber Panel, (Straight side no overlap)
PAR-2424FL	2"x24"x24" Ballistic Rubber Panel, Flip-Lock
PAR-2448	2"x24"x48" Ballistic Rubber PANEL
PAR-91224	9"x12"x24" Ballistic Rubber Block

Ballistic Shields

When long-term protection for minimal cost is paramount, the **US Military trusts the Patriot Products** Ballistic Shields. Combining **AR500 steel with vulcanized ballistic rubber** in an interlocking, no-weld design, these shields feature built-in lift points making them fully portable while being deployed in a wide range of applications. Available in a myriad of sizes and **fully customizable upon request**, these zero maintenance ballistic shields will ensure years of safe lifter operation.

STANDARD FEATURES

- Interlocking, no-weld frame design requires no tools to assemble / disassemble
- Multi-terrain use
- Encloses the lifter for full protection
- Zero maintenance required
- ITAM / LRAM friendly
- Vulcanized ballistic rubber captures round after impact to minimize ricochet
- Various protection levels include 5.56, 50 cal M33 BMG, 50 cal. M8 / MK211, & 30MM MK239
- **Additional options:** available in a wide range of sizes and fully customizable upon request

Ballistic Shields

ALS-50B	50B Stationary Armor Lifter Ballistic Shield (Mono)
ALS-50BM	50BMB Stationary Armor Lifter Ballistic Shield (Modular)
ILS-50ABS	50cal Auto-Fire Single SIT Infantry Lifter Shield
ILS-50B	50cal rated Single SIT Infantry Lifter Shield
ILS-762	7.62 Single SIT Infantry Lifter Shield
ILS-7623S	7.62 ILS Infantry Lifter Shield - 3 Sided
ILS-762BR	7.62 Single SIT Infantry Lifter Shield w/Rubber kit
ILS-762BRM	7.62 Break-down Single SIT Modular Infantry Lifter Shield w/Rubber Shield Kit
ILS-762DS	7.62 rated Infantry Lifter Shield (for Theissen-style SIT)
ILS-762-WSO	7.62 rated Infantry Lifter Shield (non- shock mount)
ILS-DS50B	50B Auto-Fire Double SIT Infantry Lifter Shield
ILS-MTS-RC-762	7.62 rated Infantry Lifter Shield (for InVeris/MTSI portable SIT wi Roll-cage)
PAR-PTA-S	60"(w) Large SIT Ballistic Shield and Sub Plate Assembly (orig for SAAB)
PAR-PTA-SBR	60" Large SIT Ballistic Shield and Sub Plate Assembly with Ballistic Rubber Assy
PP-PAR-RETSC	EPR-rated, Coffin Berm Edge Shield
PSAT-0000	.50cal rated Armor Lifter Shield (MTSI-style SAT)
PSAT-TTS	.50cal rated Armor Lifter Shield (Thiessen-style SAT)

Emplacement Protector

Every range officer knows the ongoing challenge of providing EPR protection up to M855A1 and M80A1 for SIT / SAT emplacements from the regular damage of rounds and weather. The **Patriot Products PAR-RETSC coffin protector** provides a drop-in solution that saves costly time and resources associated with replacing wood and concrete while keeping troops training longer. This assembly of **vulcanized ballistic rubber and AR500 steel**, lengthens the life of targetry and structures while integrating seamlessly into the existing berm.

STANDARD FEATURES

- Rated up to 5.56, 7.62, M855A1, & M80A1
- Comprised of vulcanized ballistic rubber attached to AR500 steel
- Offers a drop-in solution
- Increases protection while decreasing costs
- Modular construction
- Virtually maintenance free
- Components easily replaced if needed
- Two models available for either heavy frontal earth protection and light earth protection
- **Additional options:** dimensions customizable to specific requirements

PP-PAR-RETSC

EPR-rated, Coffin Berm Edge Shield

Bullet Traps

From small portable systems, to multi-lane, permanent, or non-permanent structures. The Patriot Products Bullet Trap lineup can be trusted for years of safe and efficient training.

PBT3048-BRF	30"x48" Trap Ballistic Rubber Replacement Kit
PBT3048-CRB	30"x48" Portable Bullet Trap Corner Base
PBT3048-EPRK	EPR upgrade kit for PBT3048 portable bullet trap
PBT3048MG	30"x48" Patriot Bullet Trap - Military Grade
PBT3048MG-B	30"x48" Portable Bullet Trap Base NSN 1005-01-652-4969
PBT3048-RI	30"x48" Trap Ballistic Replacement Rubber Panel Inset

PBT4848MG	48"x48" Patriot Bullet Trap - Military Grade
PBT4848MG-B	48"x48" Portable Bullet Trap Base
PBT92448	24x48" Portable Rubber Block Bullet Trap
PBT-HAVSTD	Portable Stadium Bullet Trap
PP-2448LCO	Portable Lead Clean Out Trap
PP-4896PRW	Portable Range Wall Trap
PP-OSCT-40	Open Side Connex Trap, 40' Length
PP-OSCT-180	Open Side Connex Trap, 180' Length

Portable Bullet Trap

Safe and reliable **ballistic containment is paramount** for effective live-fire training. As the system of record for the US Army (PBT3048MG), the Patriot Products Portable Bullet Trap lineup can be **trusted for years of safe and efficient training**. Our revolutionary design prevents any ricochet danger for the shooter, while our lead clean-out tray ensures a **safe and proper disposal**. For maximum training efficiency, you can trust the Patriot Products system.

STANDARD FEATURES

- Rated for 5.56, 7.62 ball, and all pistol rounds
- Vulcanized rubber and 3/8" AR500 steel provide dependable ballistic containment
- Easily re-deployable by a single user
- Modular design requires only basic hand tools for assembly or disassembly
- Environmentally-friendly lead clean-out tray
- All components from rubber face to impact plate can be replaced over the life of unit
- DenShield™ frame construction
- **Additional options:** available in various sizes to meet specific requirements, ballistic rubber frame, location of handles can be engineered per the needs of the end user

PBT4848MG

48"x48" Patriot Bullet Trap - Military Grade

Block Bullet Trap

Safe and reliable ballistic containment is paramount for effective live-fire training. As the **system of record for the US Army (PBT3048MG)**, the Patriot Products Portable Bullet Trap lineup can be trusted for years of safe and efficient training. Our revolutionary design prevents any ricochet danger for the shooter, while creating the only bullet trap on the market **capable of containing EPR rounds**. For maximum training efficiency, you can trust the Patriot Products system.

STANDARD FEATURES

- Rated up to 5.56, 7.62, M855A1, & M80A1
- Proprietary EPR-rated vulcanized rubber blocks and 3/8" AR500 steel support assembly
- Provide dependable ballistic containment
- Easily re-deployable by a single user
- Handles on back for ease of moving
- Modular design requires only basic hand tools for assembly or disassembly
- Individual vulcanized rubber blocks can be replaced over the life of the unit
- **Additional options:** configurable to meet specific requirements

PBT92448

24x48" Portable Rubber Block Bullet Trap

SOF Lead Clean Out Bullet Trap

Safe and reliable ballistic containment is paramount for effective live-fire training. As the system of record for the US Army (PBT3048MG), the **Patriot Products Portable Bullet Trap** lineup can be trusted for years of **safe and efficient training**. Our revolutionary design prevents any ricochet danger for the shooter, while our lead clean-out tray ensures a safe and proper disposal. For **maximum training efficiency**, you can trust the Patriot Products system.

STANDARD FEATURES

- Rated for 5.56, 7.62 ball, and all pistol rounds
- Vulcanized rubber and 3/8" AR500 steel sacrificial plate provide dependable ballistic containment
- 4 all-terrain casters, 2 of them with brakes
- Adjustable top height from 48" up to 72" tall
- All components from rubber face to impact plate can be replaced over the life of unit
- Modular design requires only basic hand tools for assembly or disassembly
- All parts are interchangeable, detachable, and stackable for shipping and storage
- **Additional options:** available in various sizes to meet specific requirements, location of handles can be engineered per the needs of the end user

PBT3048MG

30"x48" Patriot Bullet Trap - Military Grade

Portable Range Wall Trap

Safe and reliable ballistic containment is paramount for effective live-fire training. The **Patriot Products Portable Range Wall Trap** utilizes vulcanized ballistic rubber blocks with 3/8" AR500 steel to offer a heavy duty mobile range wall. This **relocatable, ricochet-resistant solution** features a ladder on the rear of the unit for **ease of maintenance** and placing targets. For maximum training efficiency, you can trust the Patriot Products system.

STANDARD FEATURES

- Rated for 5.56, 7.62 ball, and all pistol rounds
- Vulcanized rubber and 3/8" AR500 steel provide dependable ballistic containment
- Can be used as a single 'double stack' unit or placed side-by-side for extended coverage
- Features a ladder on the rear of the unit for ease of access to the top
- Easily re-deployable with a fork lift
- Rubber blocks are easily replaced over the life of unit
- **Additional options:** available in various sizes to meet specific requirements, swivel locking wheels can be added to the design, upgrade to 1/2" AR500 steel

PP-4896PRW

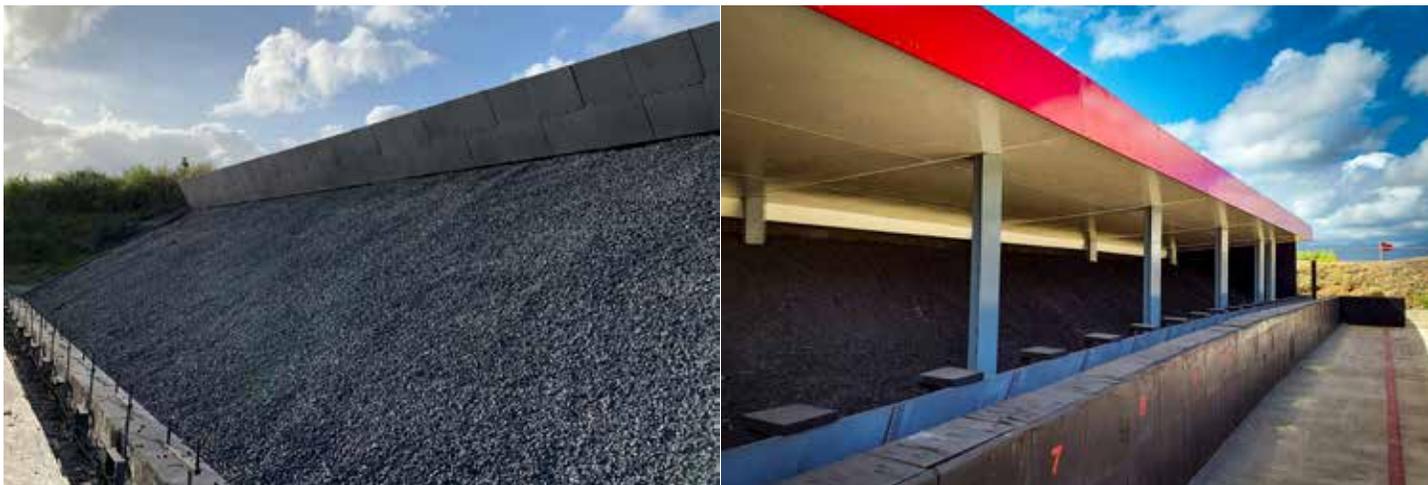

Portable Range Wall Trap

Granulated Rubber Bullet Trap

The **Patriot Products Granulated Rubber Bullet Trap** is the ideal solution for reducing SDZ (surface danger zone) while providing a **cost-effective option** for military, law enforcement, federal agencies, and private ranges. This self-contained, flexible solution maximizes safe training by capturing rounds intact for full ballistic containment, preventing splatter, and limiting lead dust and runoff while reducing impact noise. **Fire resistant 3/4" ballistic rubber granules** combine with 10ga galvanized steel plates to contain rounds from any angle or distance.

STANDARD FEATURES

- Rated for all handguns and rifles up to .308
- Top brow of AR500 steel with 2" vulcanized ballistic rubber panels
- Each lane can accept 70,000-100,000 rounds before lead removal is required
- Side containment of rubber granules
- **Additional options:** dimensions customized to meet requirements, contracts offered for ongoing maintenance and lead recovery and removal, options available from basic unit to fully optioned model, lightning protection, catwalk for easier refilling of rubber granules

PP-GRBT	(Reclined) Granular Rubber Bullet Trap (first 4 ft)
PP-GRBTA	(Reclined) Granular Rubber Bullet Trap (add'l)
PP-GRT-CW	(Optional) Rear Work Platform for PP-GRBT
PP-BTEB06	Bullet Trap Eyebrow

Fire Training Systems

Effective firefighting instruction **requires real-world training scenarios**. Patriot Products works with local civil servants to design, manufacture, and install world class solutions **to equip first responders** to be ready to answer the call. From end-user needs to creative engineering to life-like atmospherics, when seconds matter and **lives rely on muscle memory**, we've got you covered. We create custom solutions for training reliability.

STANDARD FEATURES

- Modified conex construction provides structural support for various training options
- The Patriot Joint System ensures a weather tight connection while allowing for future expansion or relocation
- Atmospheric options help to create life-like training scenarios
- Replaceable walls, resettable breach doors, multiple burn rooms, Denver/Cleveland drill props, confined space training areas, and provisions for water drainage and debris clean-up can all be included
- **Additional customization:** tell us your vision, and we'll work with you to design a solution

(MaaS) Maintenance as a Service

Range Electromechanical Field Service

As a specialized provider of maintenance and repair services for shooting ranges, we offer Expert Comprehensive Field Service Solutions tailored to both military and law enforcement. We focus on shooting range-specific components, particularly electro-mechanical and pneumatic systems, ensuring optimal performance, safety, and compliance. Our services address the unique challenges of range operations, including environmental hazards, equipment durability, regulatory requirements, and logistical constraints. Our technical expertise, and deep understanding of military and civilian shooting ranges makes Patriot Products your reliable, one-stop provider, supporting everything from routine inspections to advanced failure analysis and repair.

By partnering with Patriot Products, military, law enforcement, and civilian clients gain:

- Cost Savings: Reduced downtime, lower emergency repair costs, and extended equipment life.
- Enhanced Safety and Compliance: Proactive mitigation of hazards, ensuring regulatory adherence.
- Operational Efficiency: Rapid field support and training to maintain 95%+ readiness.
- Scalability: Tailored contracts for small civilian clubs or large DoD installations.

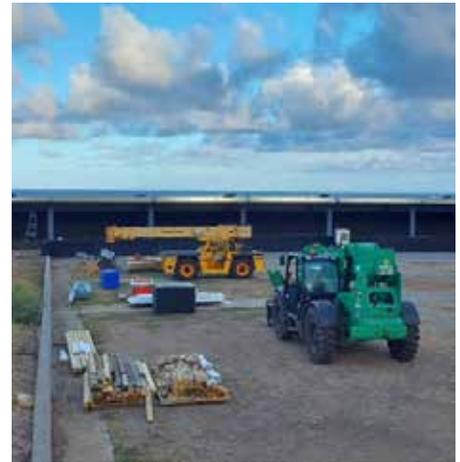

These challenges underscore the need for preventative strategies for military and civilian ranges, integrating training, maintenance, and fiscal responsibility while boosting range readiness rates which support minimized training disruptions. If unaddressed, the risk is safety incidents, reduced training efficacy, and financial strain. For tailored solutions, Patriot Products is the proactive industry leader.... earning your trust by focusing on your operational readiness needs with state of the art training solutions.

(MaaS) Maintenance as a Service

Our Services:

Our Shooting Range Technicians are highly skilled professionals responsible for maintaining all types of target systems; electric, electro-mechanical, pneumatic, overhead retrieval systems, bullet traps, ballistic containment, and ventilation systems. This role encompasses periodic inspections, preventative maintenance, troubleshooting, and assistance in range construction and modifications. Our technicians possess a strong understanding of mechanical, electrical systems, training range use cases, excellent communication and problem-solving skills, and the ability to work independently as well as in a support team, onsite and through remote support, as needed:

- **Inspections and Preventative Maintenance:** Conduct regular inspections of ranges as a holistic system to identify items needing to be repaired, upkeep, upgrade, or replacement. Perform preventative tasks such as cleaning, lubricating, calibration, disassembling / reassembling of equipment, software / firmware upgrades, and associated components to prevent failures.
- **Diagnosis and Repair:** Diagnose and repair electrical, pneumatic, and mechanical issues with range equipment. This encompasses troubleshooting defective equipment at the sub-assembly and system levels, performing root-cause analysis for electrical failures, and even full debugging of integrated robotic systems—any range, any size!
- **Installation:** Assist with the installation of new range equipment and systems including commissioning / testing, operation, and troubleshooting of integrated mechanical and electrical setups. Assemble and wire electromechanical components and sub-assemblies according to blueprints, schematics, and technical drawings in a neat and orderly manner.
- **Operational Support & Training:** Provide technical support to range staff and customers, including training military personnel in the operation and maintenance of equipment.
- **Field Service and Engineering Support:** Including functions to support In-Service Engineering Activity (ISEA) and Standard Maintenance and Repair. Provide technical guidance to meet operational requirements, such as berm rebuilding, lead mitigation, and HVAC overhauls.
